The documentary is an intimist vision of the flamenco guitar myth and a vivacious portrait of the artist.

We will listen to Paco's guitar in concerts, we will see the most complete files with Camarón de La Isla, John MacLaughlin, Al Di Meola o Manuel de Falla.

The documentary counts also interventions of friends of his, famous musicians like Chic Corea and flamenco guitarists influenced by Vicente Amigo and Tomatito.

'Francisco Sánchez, Paco de Lucía', the definitive documentary of the flamenco guitar's myth gives not only all the information about his life and his musical art, but is also an intimate and unpublished portrait that makes 'feel' and understand the man, the human being behind the genius known in the entire world.

This production, where TVE and the European canal ARTE take part, shows the artist's everyday life today, as well as the preparations of the tours and recordings.

Includes a documentary DVD and a DVD of the concerts.

Subtitles in English and French.

Available only for PAL system DVD player.

Dvd PAL system for European countries.

Dvd NTSC system for American and Asian countries.

Please make sure you are able to read this kind of video before ordering them.
