Identifiers for suitcases with original and very spanish design.

For those who have suitcases, wish to travel and want to collect them quickly while spinning on the conveyor belt, what they need is our funny identifier.

In one side, it has a transparent window with lateral slit where the passenger can insert his card with his data.

In the other side, the design of a flamenco couple dancing and a cantaor clapping.

On the other identifier, you have a bull worn like bullfighter moving with crutch during a bullfight.

These made easy to identify the suitcases between others.
