### **Cordoba 45FCE cutaway flamenco guitar.**

The 45FCE is the perfect acoustic electric flamenco nylon guitar for anyone looking for that sweet nylon sound. Featuring a smooth cutaway and 4Band Cordoba Precision electronic system with a built in tuner, the 45FCE is ready to be plugged in and amplified or played acoustically. The 45FCE is ideal for players requiring access to the higher frets, as well as the ability to plug in for electrified amplification. The 45FCE guitar has a solid European spruce top, sycamore back and sides, ultra light construction and low neck angle to generate the bright, kinetic, raspy tone that gives flamenco its unique sonic signature. The neck is slightly thinner for a quick and easy action up and down the neck, making this the a great crossover guitar for anyone looking to get into an authentic Spanish made instrument. The 45FCE exemplifies the beauty of Spanish construction and Spain's rich heritage as the birthplace of high quality performance nylon string guitars. The hand carved headstock with rosewood veneer and dark ebony for the fingerboard make the Cordoba 45FCE guitar a gorgeous and fiery-sounding instrument with a great value. Other features include a protective Cordoba tap plate and detailed wood tie block for added visual beauty.
