This Barcino figure is a **pork with wings** or **flying pork**.

You will wonder from where it comes from. A company of beer did an advertising campaign with pork which was going out flying; it became very popular. And like in Spain we are different and we love the "black leg", or the pork. We are very original making a figure with a pig with wings.

Innovative design piece inspired by the Trencadís Modernist Mosaic technology.

With more than 10 colours, hand painted.

Measures: 10cm.
