In this CD, Enrique Morente lends his voice to relive old recordings of late masters like Sabicas, Manolo de Huelva and Ramón Montoya. Morente sings an electronic by Carlos Jean dedicated to Lula, Brazilian president. There is also Latin Jazz with Cuban Alain Pérez and Neoyorican Jerry Gonzalez, and also an anti-war tune inspired on Beethoven's 'Claire of the Moon'. This CD features collaborations of Morente's daughter Estrella, a truly star on her own -check her out-, Pepe Habichuela and Tomatito, with poems from Quevedo, León Felipe or Bécquer. Music from the past is present here like Andalusí, Classic, Gregorian, Jewish... but also modern rhythms like pop, jazz and techno. This a passionate cultural album from the inside of the heart of this flamenco master.
