The master cante from Camarón and the extraordinary guitars from Paco de Lucía and Tomatito, together in a CD that is, track by track, totally enjoyable. Never before so much perfection was seen on an album. Any flamenco aficionado should have this Cd up on his to-od list. This record, in which Paco de Lucía returns to play for Camarón es capable of touching the thinnest fiber of your soul. Besides the energy put by the gypsy touch of Tomatito and Paco, this album beats and breaths, every moment, with Manuel Falla's spirit.
