With a recording anthology, Warner Music Spain wanted to pay tribute to him editing this doble CD that includes all his records realized as solist for recording companies Twins, Fonomusic and DRO between 1988 and 2005. Thirty seven topics in which Enrique de Melchor sings brilliantly a big variety of flamenco styles, accompanied in a lot of them by singers and musicians like Paco de Lucía, José Mercé, Vicente Soto, José Menese, Guadiana, Antonio Carmona, Marta Heredia,

Tomatito, Carles Benavent, Manzanita, Ray Heredia, Vuelo Blanco, Paco Rabal and Amancio Prada for instance. An indispensable work to try to understand the magnitude and the brilliance of the work of one of the most important flamenco guitarists of all times.

Palos:
